

PROGRAMS

Research

UPRCP conducts researches on key urban poor issues and concerns and presents this information from a critical, scientific and pro-poor perspective, in order to raise awareness of the realities of urban poverty and to guide public

discussion in this regard.

Education and Cultural Development

UPRCP supports urban poor communities in their efforts to foster a culture that is progressive, nationalist, scientific and pro-genuine national development.

UPRCP explores different alternative forms and avenues of education and advocacy. Among these alternative education and

advocacy activities are forums, symposiums and projects such as *CineMaralita*, a touring film festival about the Philippine urban poor and “Nanay Mameng, isang dula” a theater production that highlights the everyday

struggle of the urban poor and is inspired by the life and times of the iconic urban poor leader Carmen Deunida.

UPRCP also facilitates capacity-building, art and culture education and art productions in urban poor communities and with network individuals, organizations and art and cultural associations.

Projects and Services

UPRCP's conception has its roots in the relief and rehabilitation efforts that followed Typhoon Ondoy (Ketsana) in 2009. Today, it continues to deliver services to poor communities such as disaster preparedness training, feeding program and alternative learning system among others.

It continuously facilitates capacity-building and socio-economic projects that will contribute in empowering the urban poor.
